A banyan, also spelled "banian", is a fig that begins its life as an epiphyte, i.e. a plant that grows on another plant, when its seed germinates in a crack or crevice of a host tree or edifice. "Banyan" often specifically denominates *Ficus benghalensis* (the "Indian banyan"), which is the national tree of the Republic of India, though the name has also been generalized to denominate all figs ...
