Discover the Enterprise Design framework that aligns the overarching efforts of Branding, Enterprise Architecture and Experience Design on common course to shape tomorrow's enterprises.

Intersection – A Book about the Enterprise Design

Types Road segments. One way to classify intersections is by the number of road segments (arms) that are involved. A three-way intersection is a junction between three road segments (arms): a T junction when two arms form one road, or a Y junction – the latter also known as a fork if approached from the stem of the Y.; A four-way intersection, or crossroads, usually involves a crossing over ...

Chapter 1300 Intersection Control Type

A seagull intersection or continuous green T-intersection (also known as a turbo-T (in Florida) or High-T intersection (in Nevada and Utah)) is a type of three-way road intersection, usually used on high traffic volume roads and dual carriageways. This form of intersection is popular in Australia and New Zealand, and sometimes used in the United States and other countries.
