Automotive fuses are a class of fuses used to protect the wiring and electrical equipment for vehicles. They are generally rated for circuits no higher than 32 volts direct current, but some types are rated for 42-volt electrical systems. They are occasionally used in non-automotive electrical products.

Making the crimp If you are using an un-insulated crimp and need to sleeve it, put a suitable piece of sleeving onto the wire. Typically 3:1 shrink ratio, adhesive lined heat shrink would ensure that good support of both the wire and crimp is made. A length at least 2 times the crimp barrel will usually give a good grip.
