PROTOCOL ON ENVIRONMENTAL PROTECTION TO THE ANTARCTIC

australian protocol procedures pdf

SOAP (abbreviation for Simple Object Access Protocol) is a messaging protocol specification for exchanging structured information in the implementation of web services in computer networks. Its purpose is to provide extensibility, neutrality and independence. It uses XML Information Set for its message format, and relies on application layer protocols, most often Hypertext Transfer Protocol ...

SOAP - Wikipedia

The Protocol on Environmental Protection to the Antarctic Treaty (also known as the Madrid Protocol) provides for comprehensive protection of Antarctica, the last great wilderness on earth.. The Protocol was adopted in 1991, harmonising and expanding on a range of earlier provisions relating to protection of the Antarctic environment.

Fluorocarbons, sometimes referred to as perfluorocarbons or PFCs, are, strictly speaking, organofluorine compounds with the formula C_xF_y , i.e. they contain only carbon and fluorine, though the terminology is not strictly followed. Compounds with the prefix perfluoro-are hydrocarbons, including those with heteroatoms, wherein all C-H bonds have been replaced by C-F bonds.
